This game is fun and challenging to play. It's easy to get caught up in the game play. I can really catch some air when I use boost to climb or get around.. Game is surprisingly fun! I downloaded it for my kids, and ended up playing with them. VR multiplayer is amusing. Controls take some getting used to, but I'll be watching this title.. **EDIT** Wow, thank you so much supsteam21, honestly the best support I have gotten for a game yet. I still believe that the game is flawed but the potential is higher than birds in the sky. Give it a chance, keep and eye on this. I returned this game, coop is horrendous since vr person cannot do anything, but besides the lack of it being able to work. Pretty awesome.. Edit: I have never seen a developer put so much effort in for his

customers, he immediatly acted and fixed the complaints i gave him, it's much better when i tried it again the next day. Thank you developer, you are the real mvp. i feel bad giving this a bad review, because i can really see that the devs have put allot of effort in. It is a beautifull game, weel thought thru. But the control was not ok, i mean the rolling is good and boosting to, but i was just not able to climb or roll on to anything, maybe they should have wider "rails" in the game, or make them stick a bit, but when i tried to roll on like the cables to get up, i missed them allot, and when i was on, i rolled right off again immediatly. When they improve on this ill be happy to buy again.
